

OneShot

Low cost Dose Dispensing / Filling

Specification Sheet 1 (last updated May 2019)

- Single dose dispense on operation of membrane button.
- Easy dose volume setting.
- Standard 200 series mini peristaltic pump head.
- Various tube materials & sizes.
- Fast & slow speed option.
- Flow rates up to 165 ml/min.
- Supplied with 24v DC Plug top power supply complete with UK, EU & US AC connection heads.
- AC mains supply 90-264v.
- Optional Higher Accuracy Filling Version
- Wall mounting .
- Optional stainless steel bench stand.
- Optional install kit.

Operating instructions:

To prime tube press and hold start button until led flashes, press and hold start again and led flashes slower, press and hold again led flashes fast. Press button (short press) pump will run, press button to stop pump when complete.

To set dose/filling volume press and hold start button until led flashes, press and hold again led flashes slower. The next start button press (short press) will start pump. Using container or measuring cylinder collect pump output, once desired amount is achieved press button again which will stop pump and commit setting to memory.

Unit can be re-programmed as often as required and will save the last setting entered even after power is removed from the unit.

To fill or dose press start button once, pump will then discharge volume as set. On the standard dosing version there is an approx 18 sec delay before the dose can be repeated. On the filling version this delay is 1 sec.

Maximum single dose volume is flow rate (ml) x 275.

Pump head supplied as standard with 4mm tube connectors.

OneShot

Low cost Dose Dispensing / Filling

Specification Sheet 2 (last updated May 2019)

Optional Bench stand.

Stand supplied un-assembled.

To assemble fit upright to base using nuts & washers supplied. Remove front of OneShot box and screw through rear of box and upright using screws, nuts and washers supplied. Height of box can be set to 1 of 3 positions. Fit feet supplied into base. If screwing to bench omit feet.

Optional Install kit.

Comprises: 6M of 4mm I.D pvc suction/discharge tube, Tube weight, Foot filter and 4 cable ties.

Important: The standard version of this pump is supplied sealed so the tube cannot be changed. The pump has been designed so that when the pump head has worn out it is changed as a whole. We are able to supply pumpheads unsealed for customers that wish to change the tubing periodically. Please contact our office for details.
